Journal of Computer-Based Instruction
Autumn 1985, Vol. 12, No. 4, 121-125.

INDEX TO VOLUME 12

AUTHOR INDEX

Key to reading author index – author; issue number : page number.

Avner, A.; 3: 86.

Baker, F.G.; 3: 75.
Baker, P.R.; 4: 104.
Bangert-Drowns, R.L.; 3: 69.
Baskin, A.B.; 2: 45.
Belland, J.C.; 4: 90.
Bork, A.; 3: 85.
Berger, K.; 1: 24.

Crambie, M.A.; 4: 106.
Carr, V.; 2: 34.
Cartwright, G.P.; 4: 97.
Codding, P.A.; 4: 108.

Eddins, J.M.; 2: 34.
ERIC Clearinghouse on Information Resources; 1: 27; 2: 58; 3: 88; 4: 120.

Fehling, M.R.; 2: 50.

Gastkemper, F.; 1: 8.
Greenfield, D.G.; 4: 108.

Hall, K.A.; 1: 23.
Harrison, A., Jr.; 3: 80.
Hicks, C.R.; 1: 12.
Hofstetter, F.T.; 1: 1.
Hooper, E.; 4: 101.

Jackson, L.M.; 4: 111.

Kearsley, G.P.; 2: 54; 3: 87. 4: 117.
Krockover, G.H.; 1: 12.
Kulik, C.C.; 3: 59.
Kulik, J.A.; 3: 59.

Leaven, J.; 4: 116.
Leibowitz, A.Z.; 3: 69.
Locatis, C.; 2: 28.

Marshall, R.; 4: 101.
Matthews, T.D.; 2: 44.
Merrill, M.D.; 4: 90.
Moonen, J.; 1: 8.
Munro, A.; 2: 50.
Musial, D.; 3: 80.

Nesbit, J.C.; 3: 71.

Olafson, L.; 3: 86.

Perez, E.C.; 2: 39.

Romeijn, W.; 1: 8.

Sawyer, T.A.; 1: 17.
Schloss, C.N.; 4: 97.
Schloss, P.J.; 4: 97.
Shaw, D.J.; 1: 26.
Sherman, S.J.; 1: 23.
Slaybaugh, J.; 4: 101.
Steinberg, E.R.; 2: 44; 4: 118.
Stuurman, J.; 4: 111.

Tatsuoka, K.K.; 2: 34.
Towne, D.M.; 2: 50.

van Dijk, T.A.M.; 1: 8.
Vollmer, L.; 4: 111.

Wesley, B.E.; 1: 12.
White, M.A.; 2: 39.

TITLE INDEX

Application Report: User-Friendly Methods of Judging. Leibowitz, A.Z., 3: 69.

Approximate String Matching in Response Analysis. Nesbit, J.C., 3: 71.

Book Review. *Computer Interfacing Techniques in Science.* Kearsley, G.P., 4: 118.

Book Review. *Computer Keyboarding for Children.* Olafson, L., 3: 86.

Book Review. *Computer-Literacy Needs Assessment.* Kearsley, G.P., 4: 118.

Book Review. *Computers in the Classroom/A Survival Guide for Teachers.* Shaw, D.J., 1: 26.

Book Review. *The Educational Software Selector.* Avner, A., 3: 86.

Book Review. *Expert Systems: Artificial Intelligence in Business.* Kearsley, G.P., 4: 117.

Book Review. *Mastering the Micro: Using the Microcomputer in the Elementary Classroom.* Kearsley, G., 2: 56.

Book Review. *Microcomputers and Exceptional Children.* Kearsley, G., 2: 56.

Book Review. *Microcomputers Go to School: Where and How To Get the Most from Them.* Kearsley, G., 2: 56.

Book Review. *Microcomputers in Education Conference: Literacy Plus.* Kearsley, G., 3: 87.

Book Review. *Microcomputers in Elementary and Secondary Education: A Guide to the Resources.* Kearsley, G., 2: 57.

Book Review. *Personal Computers for Education.* Kearsley, G., 3: 87.

Book Review. *Science Computer Programs for Kids and Other People.* Kearsley, G.P., 4: 118.

Book Review. *A Teachers Companion to Microcomputers.* Kearsley, G., 3: 87.

Book Review. *The Technology of Text (Volumes One and Two): Principles for Structuring, Designing, and Displaying Text.* Steinberg, E.R., 4: 118.

Book Review. *A User's Guide to PILOT.* Kearsley, G.P., 4: 117.

Book Review. *The Well-Trained Computer.* Kearsley, G., 2: 56.

Competency-Based vs. Linear Computer Instruction of Music Fundamentals. Greenfield, D.G., Codding, P.A., 4: 108.

Computer Analysis of Students' Procedural "Bugs" in an Arithmetic Domain. Tatsuoka, K.K., Eddins, J.M., 2: 34.

Computer Assisted Instruction: Learning Style and Academic Achievement. Burger, K., 1: 21.

Computer-Based Instruction for School Board Members — A Potential Solution to the Problem of Implementing National Training Programs. Harrison, A., Jr., Musial, D., 3: 80.

Computer-Presented Organizational/Memory Aids as Instruction for Solving Pico-fomi Problems. Steinberg, E.R., Baskin, A.B., Matthews, T.D., 2: 44.

A Computer Simulation To Evaluate Construction Quality of Ready-to-Wear Garments. Marshall, R., Hooper, E., Slaybaugh, J., 4: 101.

Effectiveness of Computer-Based Education in Secondary Schools. Bangert-Drowns, R.L., Kulik, J.A., Kulik, C.C., 3: 59.

Effects of Attitude and Task Complexity on Microcomputer Text-Editing. Jackson, L.M., Vollmer, L., Stuurman, J., 4: 111.

Eighth Annual Peter Dean Lecture. Perspectives on a Decade of Computer-Based Instruction, 1974-84. Hofstetter, F.T., 1: 1.

ERIC Research Abstracts. ERIC Clearinghouse on Information Resources, 1: 27; 2: 58; 3: 88; 4: 120.

Human Factors Considerations in Computer-Assisted Instruction. Sawyer, T.A., 1: 17.

Instruction Intrusiveness in Dynamic Simulation Training. Munro, A., Fehling, M.R., Towne, D.M., 2: 50.

Locus of Control and Acquisition of Computer Literacy. Wesley, B.E., Krockover, G.H., Hicks, C.R., 1: 12.

Motives for CAI in Post-Secondary Education. van Dijk, T.A.M., Gastkemper, F., Moonen, J., Romeijn, W., 1: 8.

Peter Dean Lecture. Where Is the Authoring in Authoring Systems? Merrill, M.D., 4: 90.

Placement of Questions and Highlights as a Variable Influencing the Effectiveness of Computer Assisted Instruction. Schloss, C.N., Schloss, P.J., Cartwright, G.P., 4: 97.

Professional Paper. Computer Applications in Education and Training: A Curriculum Development Model and the Curriculum. Hall, K.A., Sherman, S.J., 1: 23.

Professional Report: CBI Research and Development Centers — CONDUIT. Leaven, J., 4: 116.

Professional Report: CBI Research and Development Centers — Educational Technology Center, University of California at Irvine. Bork, A., 3: 85.

A Prototype Computerized Vocational Guidance System for Navy Recruiting. Baker, H.G., 3: 76.

Recognition of Computer-Generated Pictures on Monochrome Monitors. Baker, P.R., Belland, J.C., Cambre, M.A., 4: 104.

Selecting Authoring Systems. Locatis, C., Carr, V., 2: 28.

Student Evaluation of Motivational and Learning Attributes of Microcomputer Software. Perez, E.C., White, M.A., 2: 39.

SUBJECT INDEX

a

Academic achievement; 1: 21.
Accept routine; 4: 91.
Achievement and affective/motivational gains; 2: 39.
Achievement effect sizes; 3: 62.
Adaptation of education; 1: 9.
Administrative computing; 2: 55.
Advanced instructional templates; 4: 94.
"Advanced organizer"; 4: 102.
Advantages and disadvantages of computers in education; 3: 87.
Advantages of authoring languages; 4: 91.
Advantages to authoring systems; 4: 92.
Affective style; 1: 21.
AGENA system; 3: 76.
Algebraic equivalence; 4: 91.
Animation editor; 4: 93.
Apple PILOT authoring language; 4: 98.
Application languages and systems; 4: 90.
Applications and issues associated with classroom computing; 2: 56.
Applications software; 2: 55.
Approaches to providing informative feedback in dynamic skill training; 2: 50.
Approximate string matching; 3: 71.
  algorithms (ASMAs); 3: 71.
Arithmetic; 2: 34.
Artificial intelligence in business; 4: 117.
Assembly language; 4: 90.
Attendance in CBE and conventional classes; 3: 65.
Attitudes toward
  computer-based instruction; 1: 2.
  computers; 3: 65; 4: 109.
  instruction; 3: 65; 4: 109.
  subject; 3: 65.
Authoring aids; 4: 90.
Authoring facilities; 2: 30.
Authoring languages; 2: 28.
Authoring systems; 2: 28; 4: 90.
  benefits; 2: 29.
Automated Guidance for Enlisted Navy Applicants (AGENA); 3: 76.

b

Basic CBI strategies; 2: 54.
Basic components and functional capabilities of microcomputers; 2: 56.
Basic instructional templates; 4: 93.
Basic principle of designing and developing CBI; 2: 54.
Benefits of authoring systems; 2: 29.
BEST (Basic Education Skills through Technology); 4: 120.
Box-score reviews; 3: 59.
Branching Programed Instruction Model; 4: 95.
BUGGY; 2: 34.
Bug types; 3: 89.
Bugs; 2: 34.
BUYER; 4: 101.

c

CAI; 1: 8, 17, 21.
  and data file management; 1: 26.
  effectiveness; 2: 30.

CBI; 1: 1.
marketplace; 1: 5.
research and development centers; 3: 85; 4: 116.
system selection criteria; 1: 3.
Character set editor; 4: 93.
Charts, control of use of and format of; 2: 45.
Chemical engineering; 3: 69.
Chemistry; 1: 27.
Classifying bugs; 3: 89.
Cognitive style; 1: 21.
Color commands; 4: 91.
Competency-based instruction; 4: 108.
Computer applications in education and training; 1: 23.
Computer-assisted instruction (CAI); 1: 8, 17, 21.
Computer-based education (CBE); 3: 59.
Computer-based instruction (CBI); 1: 1.
for school board members; 3: 80.
methods and development; 2: 54.
Computer-based training
design; 3: 82.
experiment; 2: 50.
Computer education; 1: 26.
The Computer Enjoyment Questionnaire; 4: 111.
Computer generation of natural language text; 3: 89.
Computer-generated pictures; 4: 104.
Computer instruction for generating and revising/editing narrative text; 3: 88.
Computer interfacing techniques in science; 4: 118.
Computer keyboarding for children; 3: 86.
Computer literacy; 1: 12, 26.
for school administrators and supervisors; 2: 55.
guide for elementary school teachers; 2: 56.
needs assessment; 4: 118.
requirements; 4: 118.
Computer programming by kindergarten children using LOGO; 3: 89.
Computer simulated experiments; 1: 27.
Computer simulations; 4: 101.
Computer Talents Checklist; 1: 17.
Computer use in special education; 2: 56.
Computerized vocational guidance system; 3: 76.
Computers in education; 3: 89.
Computers in the classroom; 1: 26.
Conceptual aspect of educational technology; 3: 89.
CONDUIT; 4: 116.
Conflict and content words; 3: 73.
Costs and terms; 2: 30.
Costs of post-secondary education; 1: 8.
Courseware's transportability; 1: 4.
Critical learning; 2: 58.
Curriculum and the curriculum development model; 1: 23.

d

DEBUGGY; 2: 34.
Decade of CBI; 1: 1.
Decision making; 1: 27.
Design of CBI; 2: 54.
Designing and producing videotex instruction; 3: 88.
Designing systematic instruction materials for the classroom microcomputer; 2: 56.
Designing text; 4: 118.
Development of CBI; 2: 54.
Diagnostic system; 2: 34.
Disk access; 4: 92, 95.
Disk space and memory overhead; 4: 92, 95.
Display commands; 4: 91.
Displaying text; 4: 118.
Documentation; 1: 19.
/training; 2: 31.
Dual judging problems; 3: 69.
Dynamic simulation training; 2: 50.
Dynamic skills; 2: 50.

e

Edit sequence; 3: 73.
Educational computing; 4: 120.
Educational software selector; 3: 86.
Educational Technology Center, University of California at Irvine; 3: 85.
Effect of the order; 1: 18.
Effectiveness of computer assisted instruction; 4: 97.
Effectiveness of computer-based education in secondary schools; 3: 59.
Effects of attitude and task complexity on microcomputer text-editing; 4: 111.
Effects of microcomputers in the classroom; 3: 87.
Effects of practice on accuracy scores; 4: 112.
Effects on achievement; 3: 59.
Electronic games; 1: 27.
Erroneous algorithms; 2: 34.
Error diagnostic computer program and system; 2: 34.
Error handling; 1: 19.
"Error vector" system; 2: 34.
Evaluate instructional formats; 4: 97.
Evaluating text; 4: 118.
Evaluation; 2: 39.
of educational software; 1: 27; 2: 54.
procedures; 2: 29.
studies of computer-based education; 3: 59.
Examination performance and study features; 3: 64.
Execution speed; 4: 92, 95.
Expert systems; 4: 117.
Explicit mention of motives; 1: 8.
Exposure to computers survey; 4: 112.
Extension of education; 1: 9.
Extra possibilities; 1: 9.

f

Factors influencing the learning process; 1: 21.
Features of computer-based education; 3: 62.
Feedback formats; 4: 97.
Females and microcomputer use in schools; 4: 120.
Figure/ground organization; 4: 104.
Figure of Merit; 1: 2.
Frames as the building blocks; 4: 95.
Full screen text editors; 4: 92.

g

General Image Generator and Interpreter (GIGI); 4: 102.
General impact of microcomputers on community colleges; 2: 55.
Goals; 1: 24.
Godel's numbering; 3: 70.
Graphic commands; 4: 91.
Graphics editor; 4: 93.
Guidelines for designing computer-assisted instruction; 1: 17.
Guidelines for the design of effective CAI courseware; 1: 18.

h

Hand-held electronic devices; 1: 27.
Hardware requirements; 1: 30.
Hardware variables; 1: 17.
Higher level, general-purpose languages; 4: 90.
Human factors; 1: 17.

i

Implementation of microcomputers in the classroom; 4: 120.
Improving results; 1: 9.
Initiation of students to computer use; 1: 9.
Instruction intrusiveness; 2: 50.
Instructional
  computing; 2: 54.
  design activities; 3: 82.
  software; 2: 54.
  strategies; 4: 108.
  transaction; 4: 96.
Intelligent CAI; 4: 94.
Interactive dynamic simulations; 2: 50.
Internal organization of text; 4: 118.
Introduction to computer applications in education; 3: 87.
Intrusive feedback experiment with the AIC simulation training system; 2: 53.
Intrusive instruction mode; 2: 50.

j

Judging; 3: 69.

k

Keyboarding; 3: 86.
Knowledge structures; 2: 50.

l

Learning attributes; 2: 39.
Learning style; 1: 21.
Less-intrusive instruction mode; 2: 50.
Levels of computer languages; 4: 90.
Limitations of authoring languages; 4: 91.
Limitations of instructional technologies; 3: 89.
Limitations on instructional design; 4: 95.
Linear computer instruction; 4: 108.
Link to subroutines in general purpose language; 4: 91.
Locus of control; 1: 12.
  of processing; 4: 118.

m

Machine/assembly language level; 4: 90.
Machine recognition of the similarity or equivalence of character strings; 3: 71.
Major advantages to authoring systems; 4: 92.
Management attributes; 2: 39.
Management of the student's progress; 1: 19.
Match routine; 4: 91.
Melen's law; 1: 3.
Memory/organizational aids; 2: 44.
Message design; 4: 104.
Meta-analyses; 3: 59.
Methodology; 3: 64.
  of designing courseware; 2: 56.
Methods for improving the user-computer interface; 1: 27.
Microcomputer applications in administration and instruction; 2: 55.
Microcomputer generated graphics; 4: 106.
Microcomputer software; 2: 39.
Microcomputers and educational administration; 2: 55.
Microcomputers and exceptional children; 2: 56.
Microcomputers in education; 3: 87.
Microcomputers in elementary and secondary education; 2: 57.
Microcomputers in science education; 4: 118.
Microcomputers in the elementary classroom; 2: 56.
MicroSIFT courseware evaluations; 3: 88.
The Minnesota Computer Literacy and Awareness Assessment (MCLAA); 1: 13.
Monochrome monitors; 4: 104.
More adequate method; 1: 9.
Motivational attributes; 2: 39.
Motives; 1: 8.
  vs. modes of CAI; 1: 10.
  vs. results of CAI; 1: 10.
The Multidimensional-Multiattributional Causality Scale (MMCS); 1: 13.
Music fundamentals; 4: 108.

n

Narrative reviews; 3: 59.
National computer-based teaching package for school board members; 3: 80.
Nature of CAI; 2: 55.
Non-structured program design; 4: 96.

o

Ordering of motives; 1: 8.
Outcomes of the use of computer-based education; 1: 8.

p

Parsing of natural language; 4: 91.
Perceptual development; 4: 104.
Peripheral device
  commands; 4: 91.
  editors; 4: 93.
Personal computers for education; 3: 87.
Physiological style; 1: 21.
Pico-fomi problems; 2: 44.
PILOT; 4: 117.
Placement of questions and highlights; 4: 97.
The PLANIT algorithm; 3: 71.
PLATO; 4: 94.
  spelling algorithm; 3: 74.
Politics of and barriers to educational innovations; 3: 89.
Portability; 4: 92, 95.
Positioning commands; 4: 91.
Post-secondary education; 1: 8.
Principles for structuring, designing, and displaying text; 4: 118.
Principles of software design; 2: 54.
Printing rates; 1: 17.
Problems associated with authoring systems; 4: 94.

Procedural "bugs"; 2: 34.
Process versus content; 4: 118.
Program development; 1: 23.
Program documentation; 1: 19.
Programed instruction model; 4: 95.
Programming design considerations; 3: 82.
Programming languages; 1: 28.
Project BEST products; 4: 120.
Prospects for the future of computer based education; 2: 54.
Publication history; 3: 64.

q

Question frames; 4: 94.

r

Reading comprehension; 4: 114.
The Reading Comprehension Test for Personnel Selection; 4: 111.
Recognition of computer-generated pictures; 4: 104.
Reducing costs; 1: 9.
Relationship between retention and feedback delay; 1: 18.
Representation in memory and of knowledge; 2: 58.
Response analysis; 3: 71.
Royalties; 4: 92, 95.

s

Science computer programs; 4: 118.
Selecting authoring systems; 2: 28.
Settings; 3: 64.
SIGNBUG; 2: 34.
Similarity or equivalence algorithms; 3: 71.
Simulation training; 2: 50.
Simulations in textiles and clothing; 4: 101.
Sizes of text windows; 1: 17.
Software; 1: 18.
Sound commands; 4: 91.
Sound effects editor; 4: 93.
Soundex algorithm; 3: 72.
Source; 2: 29.
Spearman's rho; 1: 22.
Special purpose editors; 4: 92.
Statistical analysis; 3: 63.
Strategies for developing educational software; 2: 54.
Strategies for solving non-routine problems; 2: 44.
String equivalence algorithms; 3: 71.
String similarity algorithms; 3: 72.
Structuring text; 4: 118.
Student evaluation of BUYER; 4: 102.
Student management system; 4: 93.
SYMONDS; 3: 72.
System output; 2: 30.
System selection criteria; 1: 2.

t

Taking over routine jobs of students and teachers; 1: 9.
Target audiences; 1: 24.
Task complexity; 4: 111.
Teachers companion to microcomputers; 3: 87.
Teaching about computers; 3: 59.
Teaching concepts in the field of clothing construction; 4: 101.
Teaching methods; 1: 21.
Teaching through computers; 3: 59.
Techniques for judging equivalent forms of responses; 3: 69.
Techniques for making explicit the organization and content of text; 4: 118.
Telidon distance education; 4: 120.
"TESS"; 3: 86.
Text editing devices; 1: 17.
Text frame; 4: 93.
Text generation; 3: 89.
Text size and font commands; 4: 91.
TICCIT; 4: 94.
    version of the PLATO spelling algorithm; 3: 74.
Treatment procedures; 4: 112.
Trends in computer-based instruction; 1: 1.
Trends in the computer world; 2: 55.

u

Underlying philosophy; 1: 23.
Unique capabilities; 1: 9.
User-computer interface; 1: 27.
User-friendly methods of judging; 3: 69.
User's guide to PLATO; 4: 117.

v

Validity test procedures; 3: 83.
Video games; 2: 58.
Video interface editor; 4: 93.
Visual displays; 1: 17.

w

Wait function; 4: 91.
Window commands; 4: 91.
Witkin's Group Embedded Figures Test (GEFT); 1: 22.
Word-processing concepts; 4: 112.
